ABSTRACT

This book provides the classroom teacher or librarian with templates and instructions for creating Web pages for use with middle school or high school students. The pages can then be used for doing research projects or other types of projects that familiarize students with the power, flexibility, and usefulness of the Web. Part I, Technology in the Classroom, includes Chapters 1 through 9, covering the benefits of creating Project Web Pages for the classroom and practical projects for various subjects. Part II, Creating Your Own Project Web Page, comprises Chapters 10 and 11, which include step-by-step instructions for creating Project Web Pages, including working with text, graphics, and tables and creating active Internet links. Instructions are included for Microsoft FrontPage and Microsoft Word. A CD-ROM included with the book contains a template for each project and handout discussed in the book for Microsoft FrontPage (HTML files) and a template for each project and handout discussed for Microsoft Word. Contains an index.
